

Mobile Sales Analysis

Objective

To build a report that tells the story of mobile sales across different regions, highlights best-selling products and trends, and helps the business understand customer behaviour better.

Dataset Description

The dataset combines information about the models sold, their prices, storage sizes, colours, operating systems, and customer demographics like age group and gender. It also captures where and how the sales were made - online, through partners, or in-store, and the type of payment used.

- **Transaction ID** = Unique transaction ID
- **Transaction Date** = Date the transaction occurred
- **Mobile Model** = Model of the smartphone sold
- **Brand** = Smartphone brand
- **Storage Size** = Device storage configuration
- **Color** = Color variant of the device
- **Operating System** = Operating system of the phone
- **Price** = Price of the smartphone
- **Units Sold** = Units sold in transaction
- **Total Revenue** = Total revenue (Price * Units Sold)
- **Sales Channel** = Sales channel used
- **Payment Type** = Method of payment
- **Customer Age** = Customer's age
- **Customer Age Group** = Age group bucket
- **Gender** = Customer's gender
- **Country** = Country of transaction
- **City** = City of transaction
- **Latitude** = City's latitude
- **Longitude** = City's longitude

Insights

Sales Overview

- **Total Revenue by Month**
 - Top revenue months = January (\$1.41M), February (\$1.37M)
 - Low revenue months = September (\$988K)
- **Total Units Sold by Month**
 - Highest units sold = January (1946), August (1706)

- Lowest units sold = March (1375)
- **Revenue and Units Sold by Storage Size, OS and Channel**
 - Android dominates across all storage segments, 64GB, 128GB and 256GB.
 - iOS is stronger only in 64GB model.
 - Online sales dominates in all metrics – Revenue, Units sold, Average Selling Price.
 - Retail Stores have the lowest average selling price (~743), possibly due to older models.
- **Revenue by Payment Type**
 - Top Performing Payment Method = EMI (\$3.89M)
 - Least used method = UPI (\$3.16M)

Demographic Analysis

- **Revenue and Units Sold by Gender**
 - Female customers out-performed male customers in revenue contribution (~49.55%).
 - Females are not only contributing the highest revenue but also leading in volume of unit sold. The “Other” category, though smaller, is consistent across both charts (~8.73%).
- **Top Models preferred by Gender**
 - Female customers spent the most on Z Fold 6 and Galaxy S25 Ultra.
 - Male customers contributed most on OnePlus 12 Pro.
 - “Others” customers contributed notably on Z Fold 6 and Pixel 9 Pro.
- **Revenue by Age Group**
 - Women aged 42-49 (\$1.79M) and 34-41 (\$1.49M) are strong spenders, indicating brand loyalty.
 - Male customers aged 26-33 (\$1.52M) is the highest spending group.
 - Older male customers above age 50 (\$1.03M) show notable spending.

Product Analysis

- **Top Brands**
 - Apple and Samsung dominate contributing nearly 49% of the total revenue, while One Plus led in unit sales.
- **Top Models**
 - Samsung Z Fold 6 and Galaxy S25 Ultra are top revenue drivers.
 - OnePlus Nord 4 and OnePlus 12 Pro are the most sold models.

Regional Sales

- **Total Revenue by Country**
 - India and Turkey generates the most revenue.
 - Pakistan and Bangladesh contributes less in revenue.
- **Total Units Sold by Country**

- India leads with 8612 units sold.
- Turkey follows with 6881 units.
- Bangladesh and Pakistan sold 2501 and 554 units, respectively.

➤ **Top 5 Cities by Revenue**

- Cities in Turkey (Bursa, Chennai, Antalya, Ankara, and Istanbul) dominate in revenue.
